

# Achieving Organizational Health and Balance

## Genuine Contact™ Program Foundational Workshop 2

8 – 9 May 2017  
Kungsbacka, Sweden

### Learn how to create sustainable improvements

Health and balance are essential conditions for growth and success in organizations. It is about choosing a life nurturing climate that supports people to achieve their potential rather than choosing a life depleting climate that has the opposite impact.

In the workshop participants learn how to do an organizational diagnosis to know what is already in place and what needs to be replaced or cleansed – important knowledge when planning to re-model or re-organize an organization.

### You will leave this experiential, interactive workshop equipped with

- A practical, holistic framework for doing an organizational diagnosis
- A complete diagnosis of your organization from your perspective
- A practical, holistic framework for achieving and maintaining long-term organizational health
- Working knowledge of basic multi-purpose tools: The Medicine Wheel Tool®, the Deep Essence Tool®, the Grief Cycle, the Organizational Lifecycle, the Storyline

### Who should participate

- Anyone who has passion to improve the culture and health and balance in the organization they are working.

### Who gives the Training

Three highly accomplished Genuine Contact trainers Thomas Herrmann (Sweden), Anna Caroline Türk (Germany) and Doris Gottlieb (US/The Netherlands), are joining forces to offer this training. They have assisted organizations such as Volvo, Etsy, World Wildlife Fund, Soundcloud, City of Gothenburg, Stena Line, and Karolinska Institutet.

The three trainers have many years experience working, teaching and practicing the complete Genuine Contact™ Program for developing cultures of leadership as a path to organizational success.
