There is an ongoing development in our society. We are constantly reachable, the flow of information is flooding over the banks and in the same time the demands are higher than ever. We face demands to deliver results, to be alert, to cooperate with or foresee the environmental changes so that we can adapt our businesses to the future.

In the middle of all this leadership become an even more important role and task. What does it takes to lead an organization through change? Is it possible? How do you create circumstances for growth – both the human capital and the financial capital?

These are some of the questions that we will explore together in this

year’s Genuine Contact Summer Academy.

You are invited to a highly participatory workshop where we will explore the issues and possibilities together.

You will benefit from this workshop if you are a leader, manager, project leader, consultant, CEO, HR manager...

The workshop led by Birgitt Williams and Ward Williams starts on the 23th with lunch at 12.00 and will end with lunch on the 27th

Thereafter we will continue with a mentoring circle with the purpose to continue to learn and exchange experiences and ideas and further develop the GC program.
